

Jardine's prized research and development department continues to exhibit excellence in design and fit! Manufacturing exhaust systems using the latest technology. High tech CMM and Vector Infrared Tracer machines copy prototypes to NASA type specs. Automated punch presses, CNC Tube Cutters and Benders manipulate metal at incredible rates of accuracy and speed.

Jardine manufactures products with expertise and quality of craftsmanship that can't be beat!

GP1-R SPORTBIKE FULL EXHAUST SYSTEMS

Jardine's GP1-R Full Exhausts system takes the exhaust on your high-performance street bike from under tail to under frame with head-turning results. Get GP factory raceteam aesthetics with our flawless system. Each unit has custom fairing exhaust outlet that is styled to match each bike with a unique Jardine tip, and the pipe is made from Tig-welded, 304 stainless steel thin-wall tubing. The GP1-R also lowers the center of gravity for improved handling response and stability at speed.

The GP1-R exhaust system is anywhere from four to 10 pounds lighter than stock and gives a horsepower boost throughout the RPM range, with an aggressive sound that is sure to get noticed wherever you roam (a quiet insert is available).

GP1 SPORTBIKE EXHAUST SYSTEMS

These systems are a perfect compliment to the racing lines of Suzuki's GSX-R600/750 and 1000 and are also available for selected Yamaha, Kawasaki and Buell models. Constructed using Stainless Steel tubing and aluminum mufflers with a durable Black powdercoat finish (where applicable) and finished off with a striking GP1 laser-etched logo. Most installations are a breeze, requiring at most a couple of wrenches and a screwdriver.

RT1 SPORTBIKE EXHAUST SYSTEMS

Constant development assures you that the RT-One will deliver the performance you want. Choose from polished aluminum, carbon fiber or titanium materials. With our "QMI" or Quiet Module Insert you have the best of both worlds: Maximum power from a race core or the neighborhood friendly tones of the QMI unit, available in single and dual outlet applications where applicable.

The Uber-trick 'Factory' style 'Dual Outlet' RT-One is derived from the development of an experimental racing exhaust system for American Honda. Three versions are available. Stainless Steel, Titanium and Carbon Fiber - each being finished off with a cool dual opening Carbon Fiber end cap. Gains of 5hp over stock, an awesome sound and weight savings of 4-10lbs will set these systems apart from others!
