

For over 30 years, SuperTrapp has been serving up leap after leap in exhaust system technology. From the original tunable disc diffuser design, to the proven race technology of Kerker, this is the stuff legends are made of.

SuperTrapp is still leading the way with new products such as the ROAD LEGENDS by Paul Yaffe, Phantom series, Mean Mothers drag pipes and the MUD SLINGER is for ATV.

ATV

MUDSLINGER SERIES

Supertrapp re-defines "Mud Bath" with the ultimate in durability and torque increase, combined with superior silencing! Get cool MODERN LOOKS, in a system that can take the abuse that aggressive riders dish out! Deep husky sound, yet U.S. Forest Service 96dB compliant. Polished Stainless Steel body with Aluminum end cap and Low Restriction core for superior flow and POWER! Deep Water Snorkel kit sold separately.

Deep Water Snorkel Kit - Fits all Mudslingers: 106-1136

ALUMINUM RACING SERIES

Put on the 4" Disc Aluminum Racing Series. You'll immediately feel and hear the difference that SuperTrapp's adjustable disc diffuser system can make.

By adding or subtracting discs in the exhaust outlet, you can adjust the powerband and sound of your ATV. More discs make it run louder and faster. Less makes it run quieter and delivers more low-end torque. Brushed Aluminum canister and Steel core with High Tech packing. The **XD Racepipe** includes a red Open End cap and 180 degree exhaust shield.

IDSX SERIES

When you need more low-end torque and near stock sound levels from your ATV, lean on the IDSX Series. This lightweight stainless steel workhorse is designed specifically for today's big bore utility quads. It is ideal for applications such as farming, hunting and all-terrain riding. And because it also features SuperTrapp's adjustable disc diffuser system, you can still tune it for more speed and sound if the urge ever arises.

The IDSX features a 3 in. internal disc design in a 4.5 in. canister, Silent Sport® packing and a USFS approved spark arrestor. The internal disc design keeps mud from clogging discs, while the turn-down outlet prevents fender melting.

TC RACE SYSTEM

Designed for Race and Sport quads by legendary engine builder Tom Carlson, the TC Race System is quieter than most pipes on the ATV racing circuit, but it boasts a broad delivery of power throughout the RPM range!

These **COMPLETE SYSTEMS** have a stepped headpipe, rebuildable core and packing, and a U.S. Forrest Service approved spark arrestor when used with a closed end cap.

IDS2 SERIES

Want the most popular, lightweight, tunable, disc-based, aluminum aftermarket exhaust for sport quads? Try the IDS2 Series with SuperTrapp's internal disc system. By adding or subtracting discs in the exhaust outlet, you can **adjust the powerband and sound** of your ATV. More discs make it run louder and faster. Add an optional open end cap and get the equivalent of an additional 3 to 6 discs. Conversely, removing discs will make your ATV run quieter and have more low-end torque.

The IDS2 also features an extra large 2 in. opening for increased flow. Yet the concealed disc design keeps mud out of the discs, while the turn-down outlet prevents fender melting.

Also choose from the IDS2 Quiet Core for near stock sound levels and increased power. Or the Race Core for maximum power and "reasonable" sound levels.
