

TWIN AIR Filter's patented design, high quality materials and superior construction deliver unbeatable performance and protection - and make Twin Air Filters the hands-down choice of more World and National Champions than all other filters combined!

TWIN MX AIR FILTERS

1. Coarse open-pore foam catches airborne dirt, grime and sand.
 2. Fine open-pore inner foam acts as a second filter to trap the smallest particles while ensuring maximum air passage.
 3. Exclusively formulated adhesive withstands repeated cleaning, even with harsh solvents or gasoline.
 4. Thick, flat foam, greaseless sealing ring ensures maximum contact with your airbox, while acting as a breathable gasket for increased air passage.
 5. Unlike the other brand's inferior two piece design, Twin Air uses a fused outer and inner element, providing maximum air flow by preventing dirt and grime from becoming trapped between layers.
- Flow bench proven to provide up to a 25 percent increase in air flow while maintaining maximum filtration.

MX / ATV POWER FLOW KITS

BIO POWER FLOW KIT

- Power Flow kits come with a rigid, light weight, billet aluminum cage that provides a tight seal to the air box and replaces your flimsy plastic stock cage.
- 4-stroke kit replaces your air-restricting stock back fire screen with a special back fire-resistant layer of foam laminated to the inside of the filter.
- Custom designed dual stage filter provides leak proof fit.
- Kit also includes a pre-oiled Twin Air Filter and all necessary mounting hardware.
- New generation Power Flow kits for ATV's converts the filter mounting system from a clamp-on filter to a filter cage and wing bolt mounting system.
- These kits eliminate leaks and provide more air for increased power, but the filter can still be removed in a snap for cleaning.
- New flange system allows for the use of an Air Box cover for washing the air box.

DUST COVER

- A coarse foam pre-filter that is designed to fit over the standard filter.
- Provides an additional layer of protection in severe conditions.
- Extends the service time between filter cleaning.

AIR BOX COVER

- Ideal for use when washing the air box.
- Prevents water and cleanser from entering the carburetor intake!
- Made from high quality molded PVC; rubber sealing ring to insure a perfect fit.

EXHAUST PLUGS

- The flexible rubber exhaust plugs prevents water and dirt from entering your exhaust during washing, transportation, or exposure to harsh conditions when not in use.
- Available for 2-stroke and 4-stroke exhausts.

Model	MFR#	Retail
2-STROKE Plug	177700N	\$9.95
4-STROKE Plug	177710N	\$10.95
