

CRUISERS

3" Internal Disc Slip-On

4" Megaphone Series

SuperMeg Series

vFatShots 2:2 Slip-Ons

3" INTERNAL DISC & 4" MEGAPHONE, SUPERMEG & FATSHOTS

The government may own the roads, but they belong to you when these bad boys are on your bike. Both series feature SuperTrapp's disc diffuser system that lets you tune your bike for sound & performance. Adjust your attitude even more with the likes of staggered duals, 2:1, 2:2 and slip-ons. Plus, you can always dress up your 4 in. external disc system with an optional TrappCap. Or change the end cap on our 3 in. pipe – a great way to complete the look of your killer cruiser.

MEAN MOTHER DRAG PIPES

Want to really turn some heads? These are the drag pipes for you. The 2.5 in. stacked pipes have a wicked offset exit. Double walled construction resists bluing. And you can pick your poison with a choice of three optional end cap designs. See page 371 for styles and application charts. For fans of Yamaha, try our new Roadstar system and realize a horsepower gain of up to 8.5% over stock systems.
