## YUMICRON CX

### Calcium plate (CX) technology:

- Lower maintenance and more battery cranking power than conventional batteries.
- CX will generate **5% to 8% more cold cranking amperage** than our own high-output YuMicron lead antimony battery.
- Reduced water loss requires less service.
- CX holds its specific gravity more than three times as long as lead antimony type batteries resulting in a longer shelf life.

## YUMICRON

- **30% more starting power than conventional batteries.**
- For heavily accessorized machines or high compression engines with high cranking requirements.
- YuMicron's reserve power is a real bonus for easier starting!
